How to interpret the files in this collection

All files included in this collection were created as part of the literature search component of *Substance Use Education in Schools of Nursing: A Systematic Review of the Literature* (DOI *10.1097/NNE.0000000000000449*)

The collection contains three types of content:

1. The complete, reproducible search strategies
   a. SubstanceUseNursingEducationSearches.pdf
2. The citations considered for inclusion in the review
   a. SubstanceUseNursingEducation.enlx
3. The citation import files for Endnote X6
   a. Cinahl1458May52016.ris
   b. Cinahl1463June302016.ris
   c. Cinahl1679Jan112017.ris
   d. Embase1268May52016.txt
   e. Embase1283June302016.txt
   f. Embase1357Jan112017.txt
   g. Eric98May52016.ris
   h. Ovid980May52016.cgi
   i. Ovid299May52016.cgi
   j. Ovid353June302016.cgi
   k. Ovid937June302016.cgi
   l. Ovid1000Jan112017.cgi
   m. Ovid428Jan112017.cgi

Access to a program or software that reads PDF and xlsx is necessary to open the files. Endnote is needed to interpret the .ris, .txt, and .cgi files.

File descriptions

FIle name	Description
SubstanceUseNursingEducationSearches.pdf	This file contains notes related to the literature searches, the databases searched, the date the searches were run, the search result numbers for each database, and the complete search strategies. To rerun the searches, paste them into the corresponding databases. Note that the results might differ because of the lapse between the date the searches were run and the present day.

SubstanceUseNursingEducation.enlx	This is an Endnote X6 file that contains all citations collected through the literature searches. Duplicate citations were removed in this program and are not included in this file.
• Cinahl1458May52016.ris • Cinahl1463June302016.ris • Cinahl1679Jan112017.ris • Embase1268May52016.txt • Embase1283June302016.txt • Embase1357Jan112017.txt • Eric98May52016.ris • Ovid980May52016.cgi • Ovid299May52016.cgi • Ovid353June302016.cgi • Ovid937June302016.cgi • Ovid1000Jan112017.cgi • Ovid428Jan112017.cgi	These files contain all citations exported from the individual database searches. The files can be imported into Endnote X6 using the appropriate import options. The file names include the database searched, the number of citations resulting from that search, and the date the search was run. The searches were run on three occasions during the project; hence, the multiple files for each database. The Ovid Medline searches exceeded 1000 results and therefore had to be divided into two files each time (per institutional limits). The ERIC search only has one file because the results were the same each time.
