Description of Relationship with other CUs

Top soil above
S005-U001-Level 2
Goes down 27 cm

Description of Collection Unit

Top soil, mixed with modern artifacts such as
nails and ceramics. According to locals the top
30 cm has been worked. Mixed also with
organic fertilizer. No soil sample kept.

Interpretation of Collection Unit

Modern layer with
sporadic finds.

SW Corner of Trench

Description of Relationship with other CUs

Begins below 8005-001-001
at 27cm.

→ continues to 52cm.

* possibly a meter and a half
total before gravel is reached.

Description of Collection Unit

Very few finds. This layer is siltier than level
1 and mixed with stone.

Interpretation of Collection Unit

This level is most likely
transitional between the soil/
clay top layer and the lower
gravel level. Possibly fewer artifacts

Burial Form

may have been originally
closer to the base of the
hillside. Top layer of
artifacts may be washed
out from the base of
the hill, which would
have ideally provided
more protection
